

Lamination Film

Description

Viplastic food packaging films are used in the converter sector and as a support for various applications in the food sector.

Our technical skills allow us to supply planar, highly sealing films, with different types of slipperiness depending on the application, with corona treatment and homogeneous thickness.

Benefits

High planarity

Modulated slipperiness

Total protection from external agents

High weldability even in the presence of dust

Option of rigid or soft films

Properties

Width	500 - 3500 mm
Thickness	18 - 180 μ m
Colour	on demand
Corona Treatment	> 38 dyne/cm
Additives	antistatic, others on demand
Plastic or cardboard core	76/152 mm
